Originated from France, I moved to the US in 2014. After 10 years of working in the music industry, I decided to switch career and become a software/web developer.

I started teaching myself in May 2017, following online classes on a daily basis and applying what I learned to real life projects.

I'm looking forward to getting a first job as a Developer and integrate a team in which I could use my new skills efficiently.
